Space time (or space-time) is the time necessary to process one reactor volume of fluid, given a particular set of entrance conditions. Commonly represented by the Greek letter  $\tau$ , it is obtained by dividing the reactor volume by the volumetric flow rate entering the reactor.

A pure chemical compound is a chemical substance that is composed of a particular set of molecules or ions. Two or more elements combined into one substance through a chemical reaction form a chemical compound.

Equipment Design CSTRs consist of a tank, usually of constant volume, and a stirring system to mix reactants together. Feed and exit pipes are present to introduce reactants and remove products.

During a chemical reaction, the molecules involved have to bump into each other. The likelihood of this happening is much higher when the molecules are moving faster.

Welcome to Chemical Engineering Conferences. Chemical engineering is a multidisciplinary branch of applied engineering consisting of the application of physical science (Chemistry & Physics), life sciences including biochemistry with applied mathematics and economics to produce transform and use of chemicals, molecules materials, energy to make ...

The elements can be placed in the periodic table. The position of an element provides information about its properties. Most elements are metals, with different properties to those of non-metals.

The AIChE Annual Meeting is the premier educational forum for chemical engineers interested in innovation and professional growth. Academic and industry experts will cover wide range of topics relevant to cutting-edge research, new technologies, and emerging growth areas in chemical engineering.

Call for Perspectives. Invitation to send pre-submission inquiries on potential topic ideas for future Perspectives. The Journal of Chemical Theory and Computation publishes papers reporting new theories, methodology, and/or important applications in quantum electronic structure, molecular dynamics, and statistical mechanics.

Great article! My sixth grade teacher had the Periodic Table of the Elements on his classroom wall and I still remember the first time I walked into the classroom and saw that giant display.
